

Broadcast radio is commercial-ridden garbage, in my area. Broadcasters had a fair chance to get me as a listener/consumer, and blew it by airing bad programming and way too many commercials. XM Radio has great programming and is getting even better as time goes on by offering even more channels and features... and commercial-free! Easily worth the \$10/month. So leave XM Radio alone- they're doing a good job, unlike broadcast radio. I have a choice, and I've made it- to listen to XM Radio. Any attempt by losers to impose censorship is a bad idea, and totally un-American. Sounds like they're jealous of a successful idea. Please reject NAB's petition 04-160. NAB can't tell me what I can listen to!
